

Name Chloe Cheng

1. What is your project?

My project is about the sun and I am doing a trather  
false game about the sun

2. Why is this project worthwhile?

Wh This project is worthwhile because if you don't have the  
Sun, plants + won't grow and then we will all have know  
vegetables and then if animals don't get any vegetables then  
they won't grow and then they will die and then  
we will not get that much meat and vegetables..  
and that is why we need the Sun.

3. What do you expect to learn from this project?

I expect to learn a lot like how the sun  
was made and how big is the sun and more.
